## INDEX

### Gold Master Version 1.5 - August 2017.....

- 1.3.1 - Localization - Home, Search, Quest, Standards, Departments and CAST.....
- 1.3.2 - Extensible Grid - Home, Search, Quest, Standards, CAST and Departments.....
- 1.3.3 - Entity Page Target Handler.....
- 1.3.4 - Extensible Grid Multi Select Functionality.....
- 1.3.5 - JSON Trigger Event Handler.....
- 1.3.5.1 - Trigger Icon for Standards, Quest, and Departments.....
- 1.3.6 - Owner Should be Able to View Security Icon - Entities and Cases.....
- 1.3.7 - Save Notes on Ribbon Click - Entities and Cases.....
- 1.3.8 - Expandable Text Box Control While Typing - Quest & Departments.....
- 1.3.9 - Responsive Cards - Search, Standards, Quest, Home and Departments.....
- 1.3.10 - New Config UI.....
- 1.3.11 - RSS Blending on Home Page.....
- 1.3.12 - Modified Filter Grid for Cases in Home Page.....
- 1.3.13 - Create and View Jump Out Icon in Entity Page.....
- 1.3.14 - Implementation of System Code in Relationship Config.....
- 1.3.15 - Jump Out Icon.....
- 1.3.16 - Entity Item Export to PDF.....
- 1.3.17 - Entities Origination Center.....
- 1.3.18 - Security Feature for Entity Role Relationship.....
- 1.3.19 - Add Start/End Date field in Entity Role Assignment - Entity.....
- 1.3.20 - System Code for Publishing Purpose.....
- 1.3.21 - Hot Swap Templates in Entities.....
- 1.3.22 - View Entity Body Template.....
- 1.3.23 - Signed Installer for External Entities.....
- 1.3.23.1 - External Entities Menu Item.....
- 1.3.24 - FACTS Feature for Cases.....
- 1.3.25 - Calculated Field for Cases.....
- 1.3.26 - Lookup Control for Cases.....
- 1.3.27 - External User: Configurable Assign To Option for External User.....
- 1.3.28 - External User: Remove Certain Ribbon Items for External User.....
- 1.3.29 - External User: Case Count in Origination Center Should Only Display Cases that the External User has Access to.....
- 1.3.30 - External User: Automatic Read & Update Rights to Case when External User Creates Case.....
- 1.3.31 - Move Note Type in Cases Web and Sharepoint.....
- 1.3.32 - Related Cases in Cases.....
- 1.3.33 - Case Portal.....
- 1.3.34 - Pass in Query String Parameter with System Code and Value to Return Specific List.....
- 1.3.35 - Lookup Control For Sharepoint.....
- 1.3.36 - Allow Decimal Points in Quest.....
- 1.3.37 - Date Picker Control for Quest Item Info Field.....
- 1.3.38 - Job Function, Job Title, Basic Name, and Sub Department Does not Need to be Unique.....
- 1.3.39 - Modify Employee Deactivation/Rehiring Process.....
- 1.3.40 - Calculated Field for CAST.....
- 1.3.41 - CAST: Filters for the List for CAST Jobs and Remove Certain Columns.....
- 1.3.42 - CAST: Modify CAST Assign To Option to Consider Start Date and End Date for Entity Role Relationship.....
- 1.3.43 - Mobile: Add Save and Save & Edit Button.....
- 1.3.44 - Single A Record and/or a Single Domain for all the Stemmons Apps.....
- 1.3.45 - Kanban View for Cases and Entities.....

**1.3 - Gold Master Version 1.5 - August 2017**  
 Included Feature List and details are shared below.

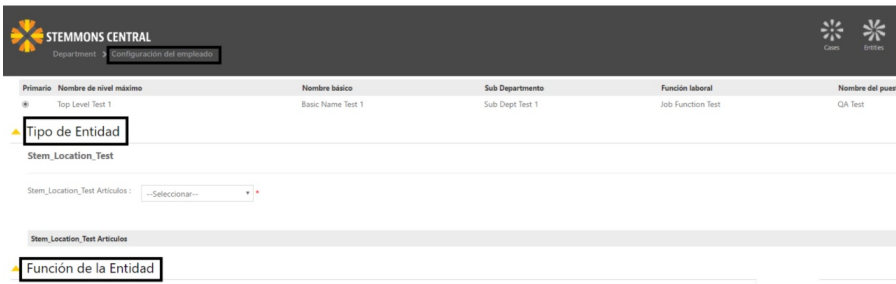

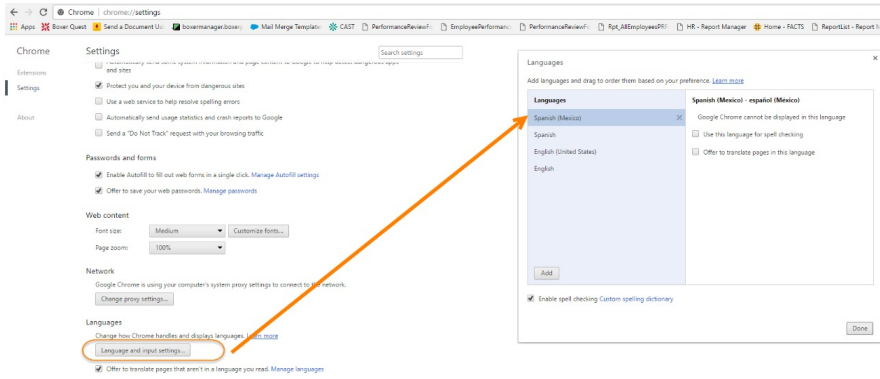

**1.3.1 - Localization - Home, Search, Quest, Standards, Departments and CAST**

Localization feature allows the applications to support other languages. The current feature will support Spanish version of the applications.

How it works:

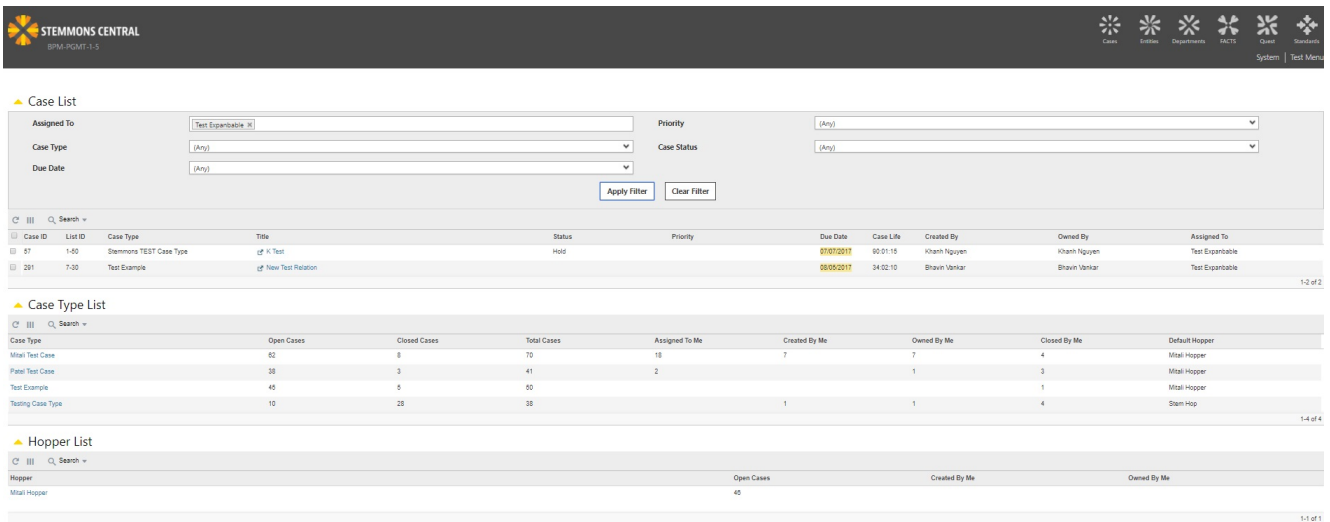

Users are able to change the language preference using the browser's control panel.

1. Navigate to the Control Panel of the browser
2. Click on the Language Setting
3. Adjust the primary language to preferred language
4. Save the change and refresh the page.

**1.3.2 - Extensible Grid - Home, Search, Quest, Standards, CAST and Departments**

The Extensible Grid is used to display information from the Stemmons applications. The grid allows user to view and search information more effectively using its built in column display, item count, and search function.

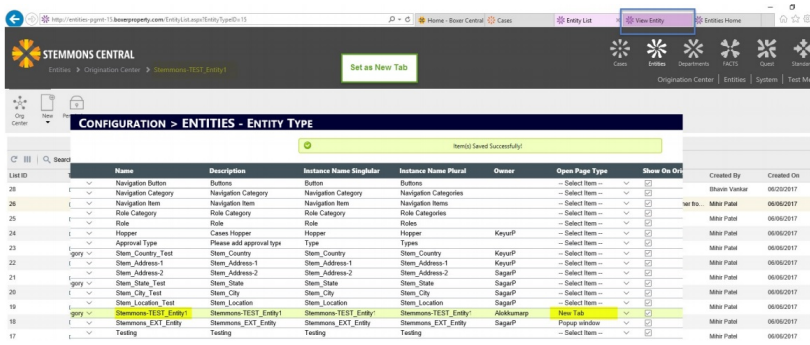

**1.3.3 - Entity Page Target Handler**  
 This is a configurable option to open Entity item. Depending on the configuration of the Entity Type, when user selects an Entity item, the system will open the item in the format selected.

How it works:

In the Entity Type configuration table, Under the Open Page Type column, user can select from the drop down the format in which the Entity item will open. The options are as below:

- New Tab
- New Window
- Popup Window
- Same Window

If no option is selected, the default format is a Popup Window.

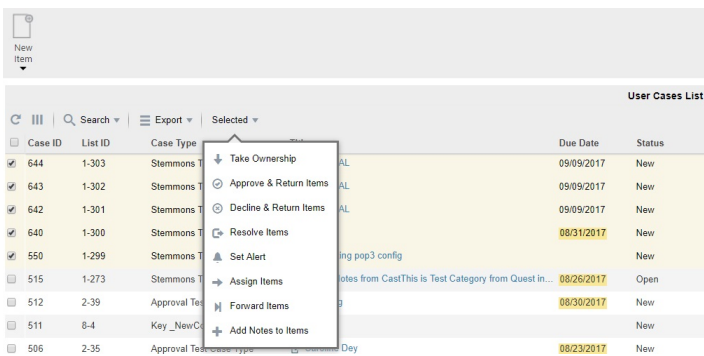

**1.3.4 - Extensible Grid Multi Select Functionality**

The multi select functionality allows users to perform actions on multiple items at once such as, close multiple cases and assign multiple entities.

**How it works:**

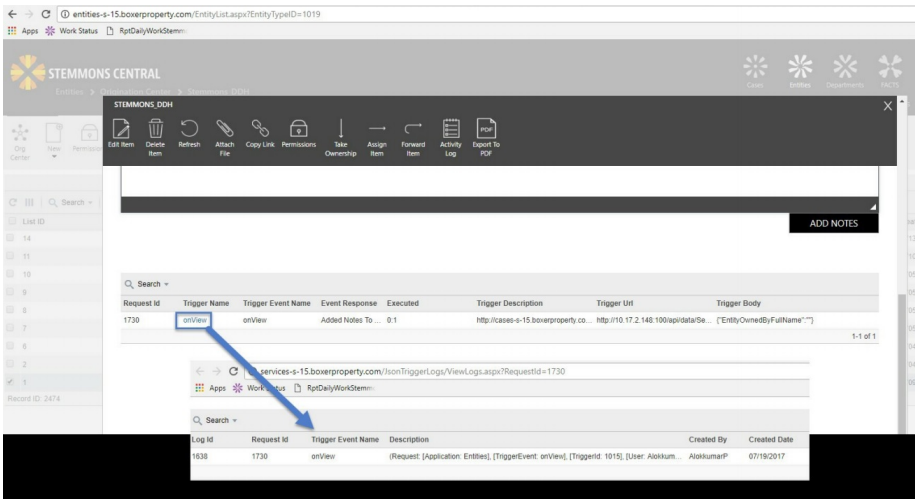

User can select multiple items using the check box to the far left of the grid. The Selected option will appear, choose a task from the drop down of the Selected option to execute the task for all checked items.

**1.3.5 - JSON Trigger Event Handler**

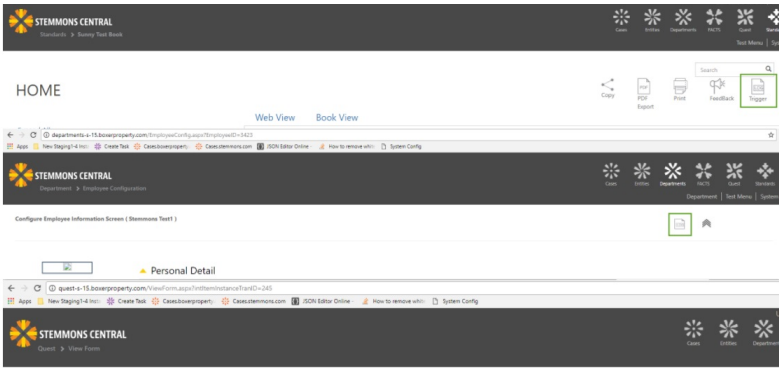

Entities, Cases, Quest, Departments, and Standards Applications can be configured to consume Trigger that can kickoff a workflow to perform certain action on a specific event. The Trigger will pass the data object to the web service where the web service has the logic to handle certain process or workflow. For example: When a new entity item is entered, a trigger is enabled to create a case,etc.

User will be able to view the logs for trigger events in the respective application.

**1.3.5.1 - Trigger Icon for Standards, Quest, and Departments**

Related to the Trigger release, the Trigger icon displays trigger logs

### QUEST EDIT FORM

#### 1.3.6 - Owner Should be Able to View Security Icon - Entities and Cases

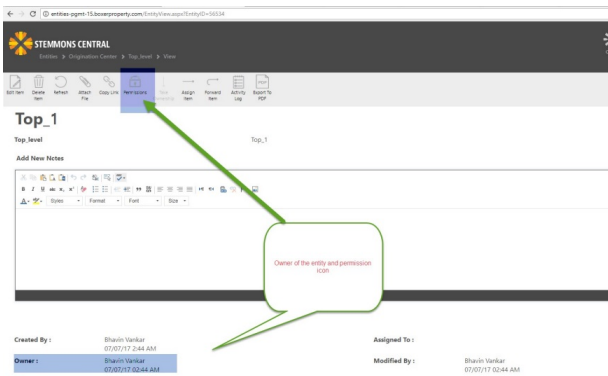

This feature allows the Owner of Cases/Entities to see the permissions icon within the Cases/Entities item in which they own without the need for Access to Config Security – this feature is configurable by Case Type/Entity Type.

#### How it works:

To give owners the ability to see the permissions button, navigate to the Case Type/Entity Type configuration table. Check the check box under the Show Permission Icon to Owner column.

**1.3.7 - Save Notes on Ribbon Click - Entities and Cases**

Notes and metadata will save on selection of the following Ribbon items:

Cases:

Save, Save & Exit, Attach File, Re-open, Approve & Return, Decline & Return, Approve & Assign, Decline & Assign, Resolve & Exit, Take Ownership, Assign To Me, Assign, Assign (Entity Role & Approver List), Forward

cases-pgamt-15.boxerproperty.com/CaseList.aspx?CaseTypeID=3

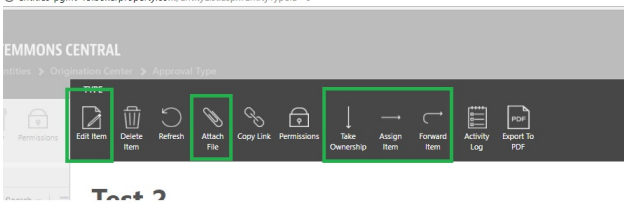

**Entity View Page:**

Edit Item, Attach File, Take Ownership, Assign Item, Forward Item, Add Notes

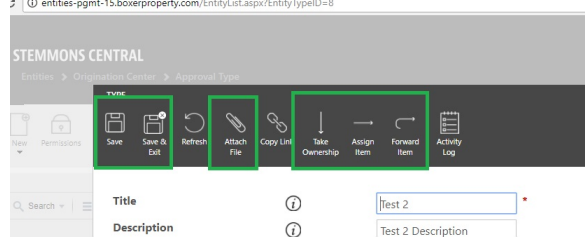

**Entity Edit Page:**

Save, Save & Exit, Attach File, Take Ownership, Assign Item, Forward Item

entities-pgamt-15.boxerproperty.com/EntityList.aspx?EntityTypeID=8

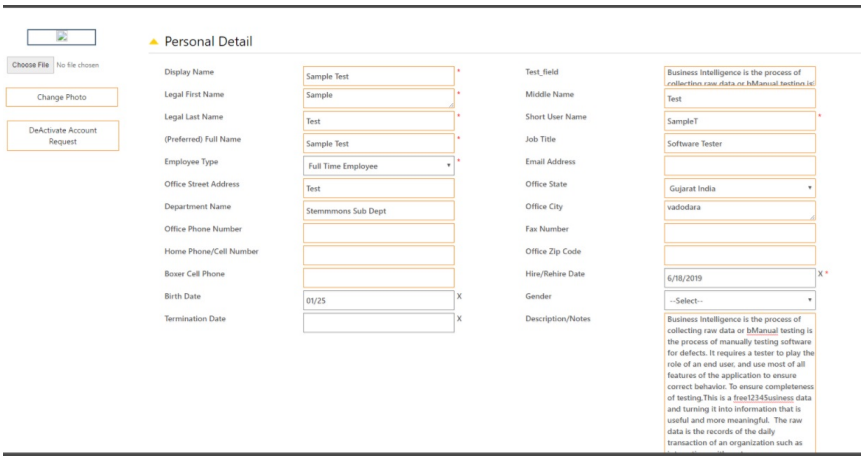

entities-pgamt-15.boxerproperty.com/EntityList.aspx?EntityTypeID=8

**1.3.8 - Expandable Text Box Control While Typing - Quest & Departments**

A new field type, "Expandable Text", is now available in Quest and Department applications. This field will expand in height as the amount of text within the field increases.

**1.3.9 - Responsive Cards - Search, Standards, Quest, Home and Departments**

Stemmons Central Applications are now responsive. The applications will adjust according to the window size.

**1.3.10 - New Config UI**

Config is now available with a new User Interface! The new config is more user friendly with improved display and navigation.

**How it works:**

The new config can be accessed using the url: home.yourdomain.com/config

### 1.3.11 - RSS Blending on Home Page

This functionality allow users to display information from various sources internally on the Home page through the use of RSS feeds. The information displayed would be prioritized based on date and time.

Note: Home can display up to 25 post.

#### How it works:

To configure the RSS source for Home page:

1. Access the Home RSS Source from Central Configuration.
2. Complete the following fields:

- **Home\_RSS\_Source\_ID:** Unique system identifier generated by system
- **URL:** Copy the required RSS feed url (Note: the system supports only RSS feed url's which returns XML format data)
- **Description:** Enter a description of the source
- **Is\_Active:** Check the box to make it active

### CONFIGURATION > HOME RSS SOURCE

**Health Screening**

Testing is done with one simple finger stick.

**Screening includes:**

- Total Cholesterol
- HDL & LDL
- Glucose
- Triglycerides
- Blood Pressure
- Personal Wellness Profile
- Personal Wellness Coaching

Please allow 20-25 minutes to participate. Walk-ins will be taken based on availability. Participating Boxer Property employees will receive a discount on their medical premiums for 2018.

Dolphin attacks fool Amazon, Google voice assistants

Smart assistants by Amazon, Apple and Google respond to ultrasonic commands that humans cannot hear.

### 1.3.12 - Modified Filter Grid for Cases in Home Page

Improved filter grid for Cases List in Home Page. The Case List can now be filter by Cases Assigned to Me, Created By Me, Owned By Me, and Cases Assigned to My Team (cases assigned to direct report)

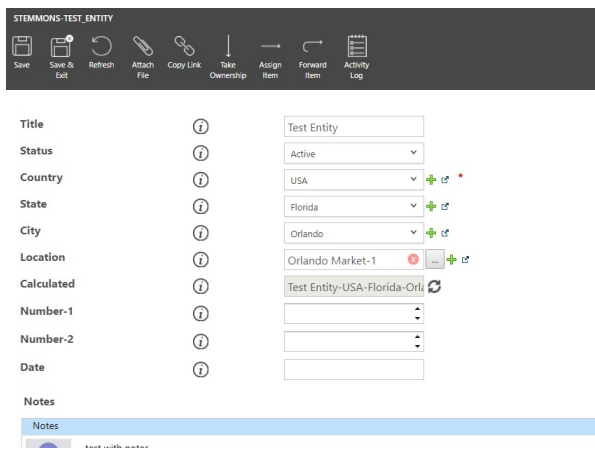

**1.3.13 - Create and View Jump Out Icon in Entity Page**

User can now Create and View Related Entity item from within the same screen using the jump out icons.

How it works:

Create and View jump out icon will automatically appear to the right of all external datasource fields within an Entity page. This allows the user to create additional data or view existing data for that field without having to navigate to another Entity page.

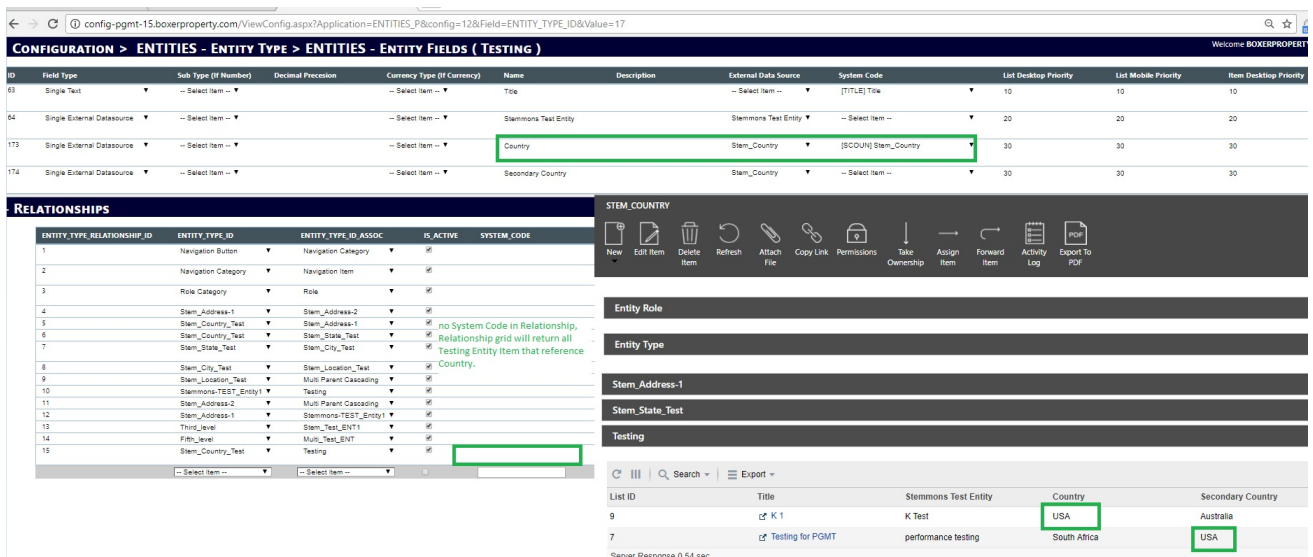

**1.3.14 - Implementation of System Code in Relationship Config**

Relationship can now be configured with system code. This is useful when an Entity has multiple fields referencing the same external data source.

How it works:

Without system code: The relationship grid will pull in all Entity item that reference the external data source value (example USA), regardless of which field the value is in.

Relationship grid will pull in only Entity item that reference the external data source value (example USA), for field with the same system code specified in relationship grid.

**1.3.18 - Security Feature for Entity Role Relationship**

Admin users can now provide other users with the permission to associate Entity Role/ Entity Type without providing Departments access to those users. The permissions are configurable per Entity Type. The security button can be found within the Entity Role/ Entity Type Admin Screen in Departments.

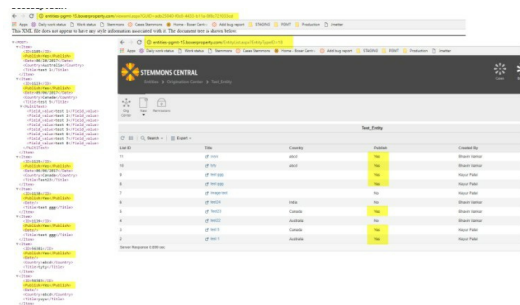

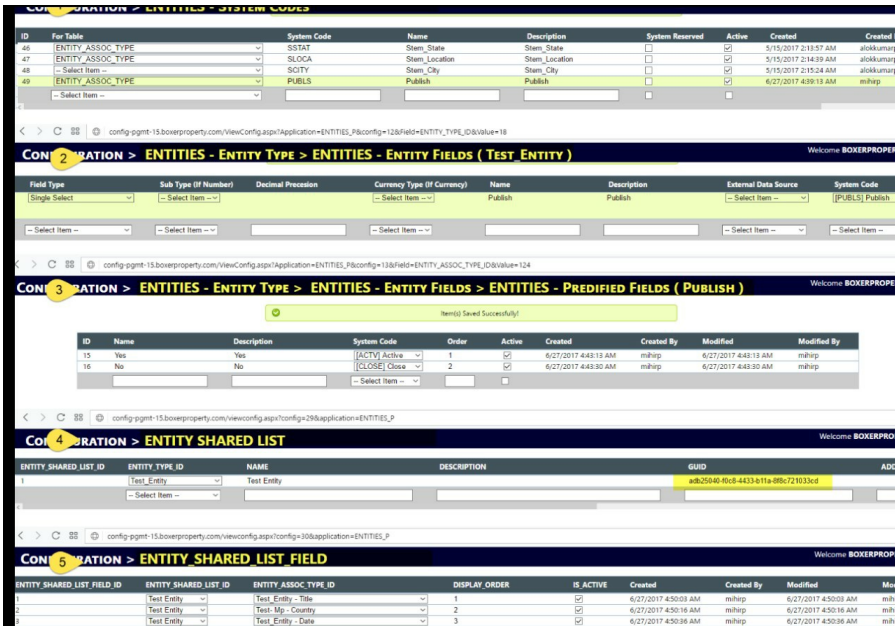

**1.3.19 - Add Start/End Date field in Entity Role Assignment - Entity**  
 Users are now able to input Start/End Date when assigning Entity Role and Entity Type through Entities.

**1.3.20 - System Code for Publishing Purpose**  
 This feature allows the user to publish Entity information to an XML feed using configurable Publish field.

**How It Works:**

This feature works with the implementation of the [PUBLS] Publish system code and is configurable per Entity Type. For a complete instructions on how to set up an XML feed for an Entity Type, please refer to the Stemmons Central User Manual>Entities>System Code for Entities Publishing Purpose (Available in GM 1.5).

**1.3.21 - Hot Swap Templates in Entities**  
 This feature enables users to swap between different customized templates in Entity. Configurable by Entity Type - both List and Entity Item View.

#### 1.3.22 - View Entity Body Template

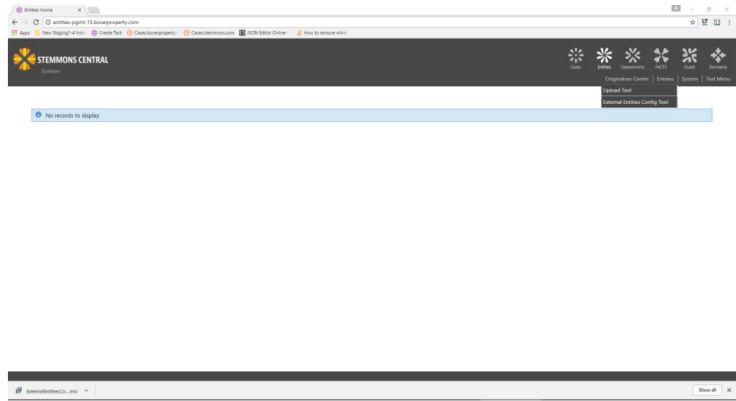

This feature enables the user to apply HTML Template to Entity Body. The information within the Entity body will display on the HTML codes written.

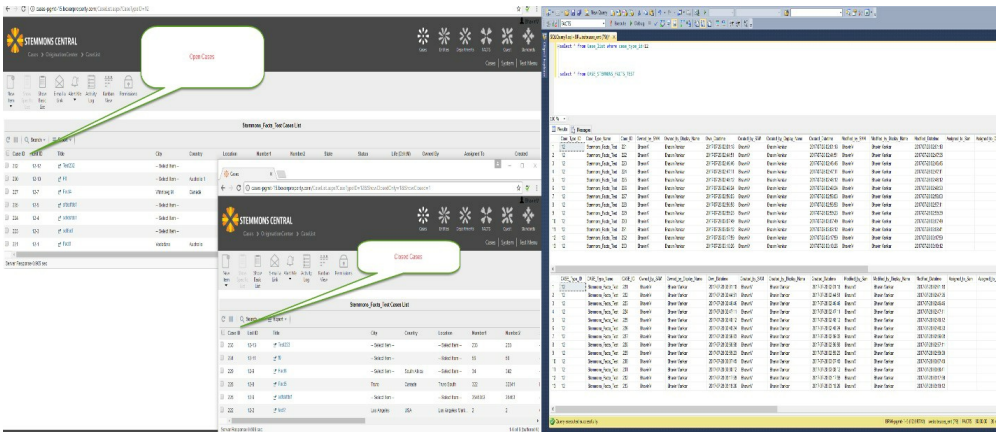

**1.3.23 - Signed Installer for External Entities**  
Implementation of Installer for External Entities.

**1.3.23.1 - External Entities Menu Item**  
External Entities installer is available for download under the Entities Navigation Menu.

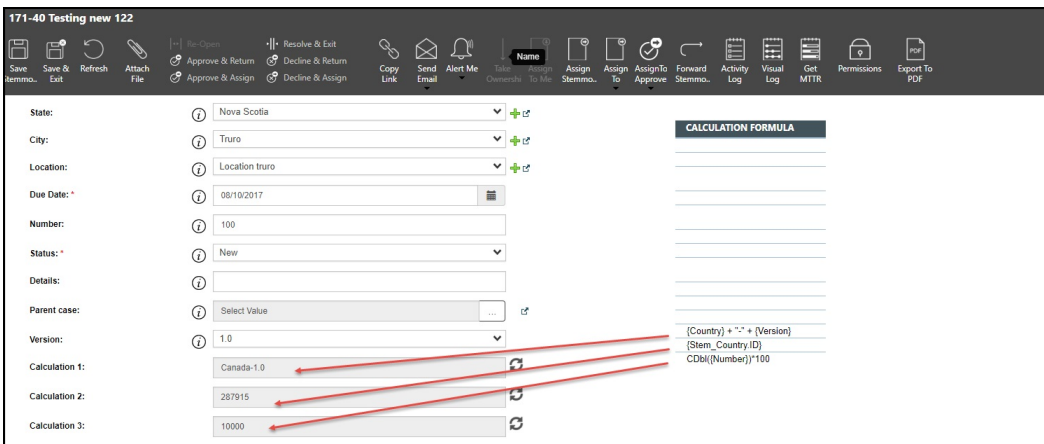

**1.3.24 - FACTS Feature for Cases**  
This feature allows the user to sync Cases data to FACTS database. The sync is configurable per Case Type.

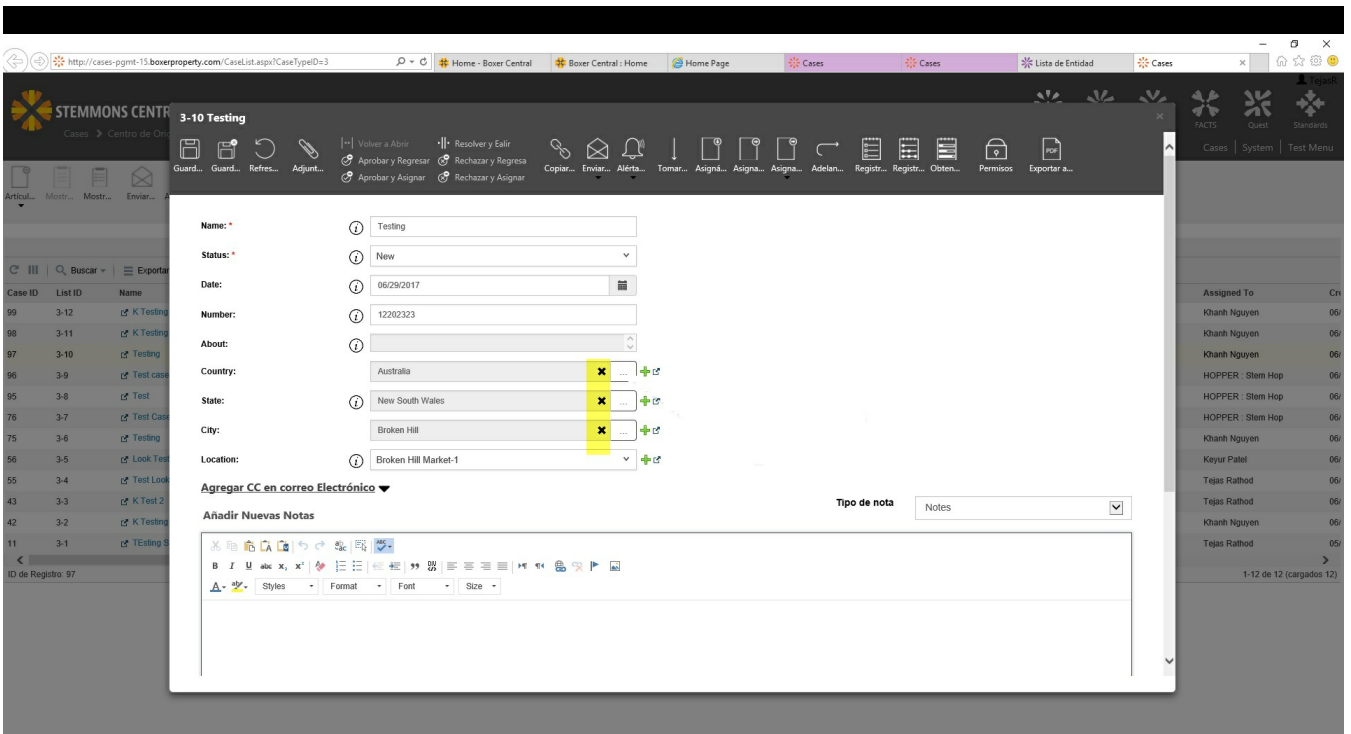

### 1.3.25 - Calculated Field for Cases

User can now perform calculations in Cases using the Calculation field type.

### 1.3.26 - Lookup Control for Cases

Users can now use Lookup controls in Cases with the implementation of the Lookup field type.

**1.3.27 - External User: Configurable Assign To Option for External User**

This feature provides users with the option to allow or not allow External Users to see Internal or External Users in the assign to field.

**How It Works:**

User can configure External User Assign to option using the External User Assign To Option Configuration table. The following are the options:

**Internal User**

- All Internal Users: External User will be able to see all Internal Users in the Assign To list
- All Users from Activity Log: External User will only see only Internal Users that are listed in the Activity Log of the case in the Assign To list

**External User**

- All External Users: External User will be able to see all External Users in the Assign To list
- All Users from Activity Log: External User will only see only External Users that are listed in the Activity Log of the case in the Assign To list
- User in Company: External User will only see External Users that are in the same company as them

The screenshot shows a configuration table for 'EXTERNAL USER ASSIGN TO OPTION' and a dialog box for assigning a case to an employee.

ID	INTERNAL_USER_WITH_OPTION	EXTERNAL_USER_WITH_OPTION	IS_ACTIVE	Created	Created By	Modified	Modified By
1	All Users from Activity Log	Users in Company	<input type="checkbox"/>	7/26/2017 3:14:40 AM	bharatkumar	8/1/2017 2:59:22 AM	sagarp
2	All Internal Users	All Users from Activity Log	<input type="checkbox"/>	7/27/2017 5:57:02 AM	TejasR	8/1/2017 2:59:22 AM	sagarp
3	All Users from Activity Log	All External Users	<input type="checkbox"/>	8/1/2017 2:42:44 AM	sagarp	8/1/2017 5:18:15 AM	sagarp
4	All Users from Activity Log	Users in Company	<input checked="" type="checkbox"/>	8/2/2017 4:26:20 AM	bharatkumar	8/2/2017 4:26:20 AM	bharatkumar

The 'Assign Case' dialog box shows a search for employees. The search results list the following employees:

- Sagar Pandya (Software QA and Tester)
- Mukesh thakor (Test Company- mukesh.thakor@boxerproperty.com)
- test log external (Test Company- testlog@test.com)
- test ext (Test Company- testext2@test.com)

**1.3.28 - External User: Remove Certain Ribbon Items for External User**

External User will see a limited Action Items in Cases ribbon.

The screenshot shows the 'Cases List' ribbon in the application interface. The ribbon includes the following items:

- New Item
- Show Specific List
- Show Basic List

The 'Cases List' table below the ribbon shows the following data:

Case ID	List ID	Name	Due Date	Calculation 1	Calculation 2	Calculation 3	City	Country	Location	State	Number	Version
1517067	171-43	verify external user assignment to rights 123	08/23/2017		287915		Winnipeg	Canada	Location winnipeg	Manitoba		-- Select Item --

1.3.30 - External User: Automatic Read & Update Rights to Case when External User Creates Case  
When an External User Creates a Case, automatic Read and Update rights will be granted at the Case level to that External User. This will prevent other External Users from being able to view the Case.

**1.3.31 - Move Note Type in Cases Web and Sharepoint**  
 The Note type drop down has been moved to upper right corner of the Notes section. Functionality has not been affected.

**1.3.32 - Related Cases in Cases**  
 This functionality in Cases allows the users to display all related cases under a single parent case. User can also configure the related case to accept Case Notes and Closed Status change from the parent case - if a parent case is closed, all the related cases will be closed and if parent case's notes is updated, all the related cases will also receive the notes.

For more information on how to configure a Parent Case to Related Cases, please refer to the Stemmons Central User Guide>Cases>Related Cases in Cases (Available in GM 1.5)

#### 1.3.34 - Pass in Query String Parameter with System Code and Value to Return Specific List

User can use query string parameters using system code and value to call a list of Cases that meets criteria(s). This is useful when user wants to search for Cases meeting certain criteria across, whether within a Case type or across all Case type. For example, user can call a Case list of all Cases with a status of New or all Cases with a priority of High and a Due Date of 9/12/2017.

#### How It Works:

To call the list, use the url: cases.yourdomainname.com/CaseList.aspx?SystemCode=entersystemcodehere:entervaluehere

To include more than one criteria, user can use the vertical bar between each criteria.

Ex: To call a list of Cases with the word "Testing" in the Title and a Status of New, user will enter the following in the URL: cases.yourdomainname.com/CaseList.aspx?SystemCode=TITLE:Testing|STATUS:New

cases-pgmit-15.boverproperty.com/CaseList.aspx?SystemCode=STTUS:New[TITLE:Testing]

**1.3.39 - Modify Employee Deactivation/Rehiring Process**  
The Deactivation/Rehiring Process has been modified as below:

- On Employee Information Screen-
1. Termination Date Field is Read Only field
  2. Allow users to enter any Termination Date (Past, Current, and Future)
  3. If Termination Date entered is <today - deactivate the account immediately
  4. If Termination Date entered is > Today
    - a. confirm with user via a message below termination date field: "Termination date is a future date. This account will be deactivated on the termination date specified above."
    - b. deactivate the account via service once the termination date is reached.
  5. Activate account for Rehire - blank out Termination Date field.

**1.3.40 - Calculated Field for CAST**  
User can now use the Calculated Field for CAST application

1.3.41 - CAST: Filters for the List for CAST Jobs and Remove Certain Columns  
 We have implemented filters for the CAST application and also revamped the CAST grid by relocating a few columns to different screens

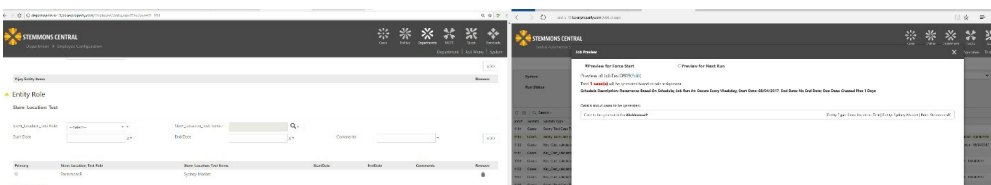

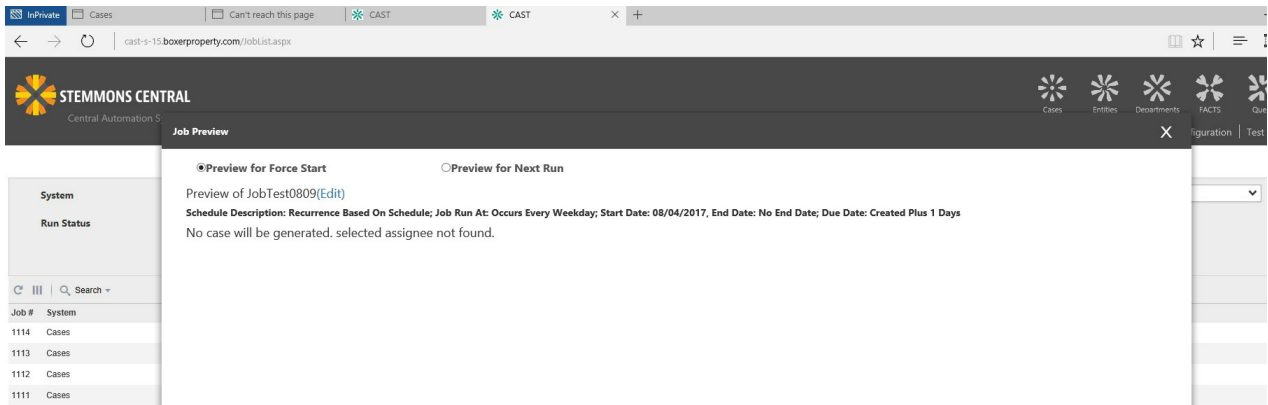

1.3.42 - CAST: Modify CAST Assign To Option to Consider Start Date and End Date for Entity Role Relationship  
 CAST has been modified to check for active Entity Role association when generating Cases that are assigned to Entity Roles.

**How It Works:**

The cases will only generate with the following scenarios:

- If Current Date (when the Job runs) is  $\geq$  Start Date and  $\leq$  End Date of the Entity Role association.
- If the Entity Role association does not have Start Date and End Date
- If the Entity Role Association has a Start Date  $\leq$  Current Date but no End Date
- If the Entity Role Association has no Start Date but End Date  $\geq$  Current Date

**1.3.43 - Mobile: Add Save and Save & Edit Button**

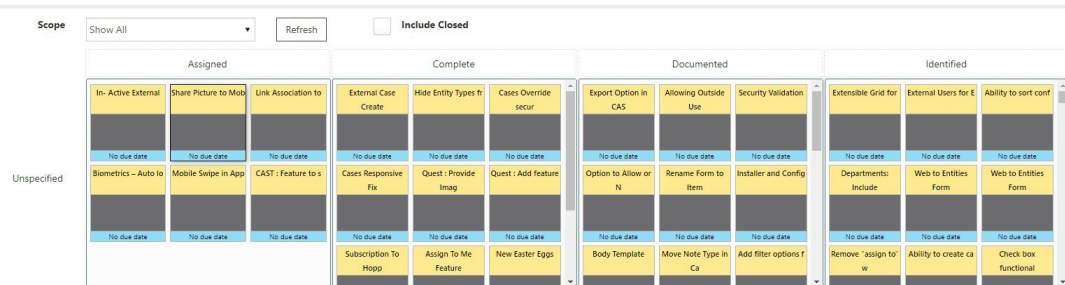

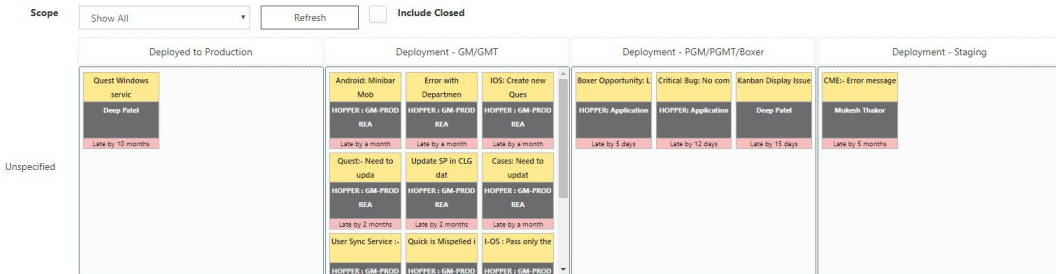

We have implemented the Save and Save & Exit button of the View/Edit screens for Cases and Entities application in Mobile.

**1.3.44 - Single A Record and/or a Single Domain for all the Stemmons Apps**

A feature for Single A record for all our apps and services has been implemented. Such as Stemmons.mycompany.com. If this is done, then user should be able to navigate to each applications by going to Stemmons.mycompany.com/Application Name (viz. Cases/Entities/Departments, etc).

**1.3.45 - Kanban View for Cases and Entities**

We have implemented a new Management Tool called the Kanban View for Cases and Entities applications which will help users track status for Cases based on a defined scope. The Kanban View button can be found on each Cases/Entity Type ribbon.

Thank You ...
